### ACKNOWLEDGEMENTS

The Steering Committee wishes to thank all agencies and individuals who supported the collection of community member feedback included in this report.

### **INTRODUCTION**

In 2022, the Onondaga County Health Department (OCHD) and local hospitals completed a Community Health Assessment to better understand the health needs of Onondaga County residents. Participating hospitals included Crouse Health, St. Joseph's Health, and State University of New York Upstate University Hospital. Feedback and data gathered through this comprehensive assessment process was utilized to develop the <u>2022-2024 Onondaga County Community Health Assessment and Improvement Plan</u>.

As part of the Community Health Assessment process, the OCHD and a Steering Committee made up of representation from each of the participating hospitals gathered feedback from Onondaga County residents on important community health issues. Feedback was gathered through a comprehensive Community Health Survey (CHS). This report details the methods utilized for administering the CHS as well as the findings from an analysis of the survey results.

### **METHODOLOGY**

### **Survey Design**

six main sections:

The survey collected data in

- 1. Healthy Community
- 2. Health Problems
- 3. Health Behaviors and Social Factors
- 4. Healthcare System
- 5. Access to Care
- 6. Impact of COVID-19

The CHS was developed by the OCHD, with input from the Steering Committee and consisted of six main sections: Healthy Community, Health Problems, Health Behaviors and Social Factors, Healthcare System, Access to Care, and the Impact of COVID-19. Demographic data were also collected. The OCHD and Steering Committee sought the input of the Central New York Healthcare Equity Task Force before questions were finalized.

In the first four sections, respondents were asked to select their top five priorities from a list of options. Respondents were also given an opportunity to provide open-ended feedback. In the Access to Care section, respondents were asked to select all circumstances that they or members of their family had personally experienced within the last three years.

The Impact of COVID-19 section was designed to collect feedback on how the pandemic impacted various aspects of health and quality of life for Onondaga County residents. Questions focused on access to childcare, essential items, transportation, and healthcare, as well as on changes in relationships, work environments, and mental or physical health. Data on changes in use of alcohol, tobacco, and drugs were also collected. Finally, respondents were asked to identify their primary concern related to COVID-19 moving forward.

Throughout the survey, respondents were given an opportunity to provide comments. The survey was available electronically and on paper and was provided in both English and Spanish. A copy of the survey can be found in the Appendix.

### **Promotion and Distribution**

The CHS was administered in April and May 2022. The OCHD and the Steering Committee promoted the CHS through a variety of methods. Additionally, public health partners, including members of the Central New York Healthcare Equity Task Force, were engaged to distribute the survey more widely. Organizational websites, list serves, and social media platforms were utilized to share the survey link. Promotional materials containing a QR code linking to the survey were distributed widely throughout the community including at laundromats, pharmacies, food pantries, and local higher education institutions. Paper copies of the survey were distributed at local job fairs and within County office buildings. Additionally, Syracuse Housing Authority (SHA) partnered with OCHD and the Steering Committee to solicit survey responses from SHA residents.

As an incentive for participation, respondents had the option to include their name and contact information to enter to win one of five gift cards to Target. All identifying information was removed prior to analysis.

### Analysis

Survey analysis was conducted using Microsoft Excel. Responses were excluded if the respondent did not live in Onondaga County or did not answer questions beyond the Residence section. Qualitative responses to the survey were categorized into themes and subthemes. Some responses were categorized into multiple subthemes to ensure all content was included in a relevant category.

### **SURVEY RESPONDENTS**

### **Characteristics of Respondents**

A total of 4,277 responses from the CHS were collected. After excluding non-Onondaga County residents and responses with no data, 3,673 survey responses remained. These 3,673 responses were analyzed further to identify common geographic and demographic characteristics of respondents. Overall, 37.7% of responses were from Syracuse residents, and 62.3% were from County residents living outside the City of Syracuse. Survey respondents were predominantly female (67.6%) and a majority (54.1%) reported having a 4-year college degree or higher. The largest age category was 35-49 years (37.3%) and the smallest was 65 years or older (5.0%). More than half of respondents (58.1%) were non-Hispanic White. Non-Hispanic Black or African American respondents made up 6.1% of survey respondents. Hispanic respondents of any race made up 6.2%. However, it is important to note, race and ethnicity were not specified or were unknown for 24.8% of respondents. A total of 70 respondents (1.9%) completed the Spanish version of the survey. Figure 1 below provides a comprehensive breakdown of the demographic characteristics of survey respondents.

Figure 1. Demogra	aphic Characteristics of Survey Respondents	Number	Percent
	Total Responses	3,673	-
Residence	Syracuse	1,384	37.7
Residence	Rest of County*	2,289	62.3
	18-34 years	737	20.1
	35-49 years	1,370	37.3
Age	50-64 years	835	22.7
	65 years or older	183	5.0
	Unknown/prefer not to answer	548	14.9

Disability	Unknown/prefer not to answer	651	17.7

\* "Rest of County" represents County residents that reside outside of the City of Syracuse.

### **PRIORITY HEALTH CONCERNS**

Select five things you believe are the most important for a healthy community. Healthy Community

A healthy community is essential for supporting healthy lifestyles and promoting a high quality of life. Respondents were asked to identify the features they felt were most important in a healthy community. The feature most commonly selected was access to health care (61.0%), followed by a clean environment (52.7%), and good and safe schools (48.2%).

### Figure 2. Top 5 Features of a Healthy Community, Onondaga County (n=3,631)

Respondents were given the opportunity to provide additional open-ended feedback in this section. Most qualitative responses focused on the social aspect of communities, including having a sense of community or belonging, having support systems in place, such as family or friends, and the importance of diversity, equity, and inclusivity. Below is a quote from one of the respondents that speaks to the importance of unity, empathy, and strong community supports.

### "Unity makes a healthy community, help each other, raise strong children, keep in mind that we are all equal in one way or another, promote self - esteem and learn to be more empathic." – Community Health Survey Respondent

Additional feedback focused on neighborhood features and the built environment. The role of public safety and law enforcement as well as the presence of crime and violence was also frequently cited by respondents. Concerns ranged from the following:

- The importance of strong community leadership.
- High crime rates, gang violence, and the need for a stronger law enforcement presence.
- Having a police force that is free from discrimination and that supports all community members.
- Concerns over gun violence in schools.
- The lack of safe spaces to be physically active.

• Concerns over crime preventing community members from participating in local events or patronizing local businesses (in particular Destiny USA).

"A key element for a healthy community in most communities is trust and honest communication. If you can walk out your door and feel safe, that is the basis of a healthy community." – Community Health Survey Respondent

### **Health Problems**

Select the five biggest health problems you believe our community is facing.

Health problems are diseases, medical conditions or environmental factors that can affect a person's health and well-being. The top three problems selected were associated with mental health and substance use challenges. Overwhelmingly, respondents indicated that addiction to alcohol or drugs is a current challenge in our community with 70.0% of respondents selecting this option. Mental health issues was the second most common response with 67.2% of respondents choosing stress was the third most selected response with 38.9% of respondents choosing this option.

When given the opportunity to provide qualitative feedback relating to health problems in Onondaga County, respondents most frequently provided comments relating to healthcare access and quality. In particular, responses focused on access to mental health and substance use treatment services. There were also several comments regarding support for healthy behaviors as well as access to programs for chronic disease prevention and management.

"As a society we need to provide more mental health support and reduce the stigma associated with seeking such help." – Community Health Survey Respondent

### **Health Behaviors and Social Factors**

Select five health behaviors or social factors you believe are the biggest problems for our community.

Health behaviors are actions taken by people that can change their health. Social factors are experiences that impact a person's lifestyle, including their ability to be healthy. Respondents selected illegal drug use (53.9%) as the leading health behavior or social factor influencing health. This was followed by neighborhood violence (45.3%) and gun violence (42.7%). In addition, nearly one third of respondents (32.1%) identified discrimination as a behavior and social factor influencing health. Concerns about illegal drug use, violence, and discrimination are consistent with the responses for the prior sections.

Figure 4. Top 5 Health Behaviors or Social Factors Impacting Health, Onondaga County (n=3,448)

Most qualitative responses in this section focused on concerns relating to substance use and violence. Many comments relating to substance use involved the following subthemes:

- Challenges in accessing treatment services.
- Concerns over the intersection of the drug trade, gang violence, and substance use.
- Increases in impaired driving due to alcohol and drugs (including marijuana).

### "People just don't feel safe anymore" - Community Health Survey Respondent

Responses focused on community safety and violence were similar to those in prior sections and included the following topics:

- High crime rates, particularly crime involving guns and/or gangs.
- Concerns relating to bias and discrimination in the police force.
- The feeling that violence has increased substantially in recent years.
- Fear relating to violence that prevents individuals and families from attending local events, patronizing shopping malls and other businesses.
- Concerns regarding rape, sexual violence, and sexual abuse.

#### **Healthcare System Issues**

Select five healthcare system issues you believe are the biggest problems for our community.

The healthcare system is made up of people, organizations, and resources that provide healthcare services to the community to meet their healthcare needs. Healthcare system issues are factors that prevent people in our community from getting healthcare when they need it. Survey respondents cite access to mental health services (70.4%) as the largest health system issue in Onondaga County, These findings are consistent with quantitative and qualitative feedback from earlier questions. Additionally, the high cost of healthcare was identified by nearly two thirds of respondents (65.0%) as a significant concern. The high cost of prescription medications was also cited (51.2%).

### Figure 5. Top 5 Healthcare System Issues Impacting Health, Onondaga County (n=3,393)

Qualitative responses for this section focused mainly on healthcare access, affordability, and quality. Comments relating to access included accessing primary care, dental care, and preventive services as well as access to mental health and substance use treatment services. Long wait times for getting appointments were frequently cited as well as providers not taking new patients or not accepting certain types of insurance. One respondent indicated that since moving to Onondaga County from the Mid-west, she has not been able to get herself or her children the healthcare they need due to long wait lists and providers not accepting new clients.

# "The high cost of medical services and prescriptions is a limiting factor for anyone in a lower income situation which leads to medical discrimination - only those with money can afford good health care" – Community Health Survey Respondent

Comments relating to affordability included concerns relating to the high cost of prescription co-pays, the cost of durable medical equipment, and difficulty finding in-network dental providers. There were also several comments about Medicaid coverage as a barrier to finding providers since many of the County's healthcare and dental providers do not accept Medicaid.

### "Discrimination and bias and lack of empathy by healthcare providers is problematic." - Community Health Survey Respondent

Respondents' comments relating to healthcare guality largely focused on discrimination, bias, and providers not listening to their patients. A gap in cultural competency was also mentioned. Others referenced staff shortages and a lack of qualified medical professionals (particularly specialists). These issues related to delays getting appointments, feeling rushed during appointments, and crowded **Emergency Rooms.** 

### **Access to Care**

Which of the

family

following have Access to quality healthcare is essential to maintain good health and prevent or you, or your manage diseases. In this section, respondents were asked to select all of the response options that they or their family had experienced within the last 3 years experienced when seeking while seeking medical care. It is important to note that this 3-year period is medical care in inclusive of the COVID-19 pandemic which may have had an enhanced impact on the last 3 years? access to and quality of care.

Among respondents, the most frequently cited experience when seeking medical care was a long wait time to get an appointment (49.4%). Other experiences frequently cited by County residents included, difficulty getting to a medical appointment due to office hours (30.0%) and the wait time in the provider's office impacting respondents' ability to meet obligations (work, family, etc.) (26.7%).

### Figure 6. Top 5 Experiences Accessing Healthcare, Onondaga County (n=3,362)

### **Responses by Demographic Characteristics**

The top priorities were fairly consistent across demographic categories with slight variations by age, gender, race and ethnicity, education level, and disability status. Variations by geography were also noted. A breakdown of top responses across demographic characteristics is provided in the Appendix. Notable findings are included below. Please note due to small numbers and high percentages of unknown or blank responses, these data should be interpreted with caution. See the table on page 5 for information on the number of respondents in each demographic category.

### Notable findings by age

- Older respondents (ages 65 years and older) were the age group most likely to select access to health care as their top feature of a healthy community (77.1%). Whereas the youngest respondents (18 - 34 years) were more focused on a clean environment (63.2%).
- When considering health behaviors and social factors, adults 65 years and older, selected gun violence at the highest rate (64.1%) compared to other age categories.

### Notable findings by disability status

- Individuals living with a disability were less likely than those living without a disability to select addiction to alcohol or drugs as a top concern (living with a disability: 67.2%, not living with a disability: 72.4%).
- Individuals living with a disability reported discrimination as a top concern at higher rates than those living without a disability (living with a disability: 36.0%, not living with a disability: 31.4%).
- Nearly one third of respondents living with a disability indicated they experienced feeling like their healthcare provider is not listening (31.5%).

### Notable findings by education level

- Respondents with a two-year college degree were the most likely (compared to respondents of other education levels) to select addiction to alcohol or drugs as a top health problem of concern (77.2%).
- 50.6% of respondents with less than a high school degree, identified alcohol abuse as a top concern in the category of health behaviors and social factors.

### Notable findings by gender

- Female respondents were more likely than male respondents to indicate addiction to alcohol or drugs as a top health problem in Onondaga County (female: 74.2%, male: 61.4%).
- Female respondents were more likely than male respondents to indicate access to mental health services as a top healthcare system issue (female: 74.4%, male: 62.1%).
- Transgender respondents were more likely to indicate difficulty getting to a medical appointment due to office hours than respondents who did not identify as transgender (transgender: 38.7%, not transgender: 29.9%).

#### Notable findings by race and ethnicity

- Hispanic respondents of any race and non-Hispanic American Indian or Alaska Native respondents identified a clean environment as a top feature in a healthy community (Hispanic: 64.5%, non-Hispanic American Indian or Alaska Native: 73.7%).
- 62.4% of non-Hispanic Black or African American respondents selected gun violence as a top concern.
- More than half of non-Hispanic Asian or Asian American respondents selected discrimination as one of their top concerns (52.2%).

#### Notable findings by residence

- Individuals residing outside of Syracuse were more likely to be concerned with adult overweight and obesity than Syracuse residents (outside Syracuse: 41.3%; Syracuse: 24.9%).
- Zip code 13205 had the highest level of concern with addiction to alcohol or drugs (79.3%).
- 52.7% of respondents residing in zip code 13202 indicated experiencing a long wait to get an appointment.

### **Comparison to Prior Years**

The CHS was previously administered to Onondaga County residents in 2016 and 2019. While the survey tool changed slightly across years (including adding COVID -19 questions to the 2022 survey), questions focused on current health concerns remained fairly similar. The figures below provide comparison data across the versions of the survey for the questions relating to the topics of *Healthy Community, Health Problems, Health Behaviors and Social Factors, Healthcare System,* and *Access to Care.* 

Please note, some response options were not included in every iteration of the survey and therefore have been left out when applicable. Additionally, the *Access to Care* topic was introduced in the 2019 survey and therefore no prior data are available for this topic.

It is important to note that the addition of new response categories with each version of the survey may dilute the magnitude of responses selected for any one response choice. Comparisons of results across years should be interpreted with caution due to changes the survey tool as described above.

Notable differences across iterations of the survey are described below:

- A good economy/good jobs became less of a priority with each version of the survey (2016: 61.0%, 2019: 55.4%, 2022: 45.7%).
- Infectious diseases became much more of a concern in 2022 (34.9%) than in 2016 (5.3%) and 2019 (11.1%).
- Illegal drug use became less frequently selected with each version of the survey (2016: 76.0%, 2019: 59.5%, 2022: 53.9%) but remains a top concern.
- Access to mental health services remains a top concern (2016: 64.0%, 2019: 71.2%, 2022: 70.4%).

# Figure 7. Top 5 Features of a Healthy Community, Onondaga County, by Year, 2016, 2019, and 2022

	2016	2019	2022
Access to health care	54.2%	61.3%	61.0%
A clean environment	36.0%	53.4%	52.7%
Good and safe schools*	48.5%	42.6%	48.2%
A good economy / good jobs*	61.0%	55.4%	45.7%
Fresh, healthy, and affordable foods close to where you live*	38.1%	38.7%	39.7%

Data note: Responses are listed in the order in which they were selected by respondents to the 2022 survey. \*Good and safe schools was listed as good schools in the 2016 and 2019 versions of the survey. A good economy/good jobs was listed as a healthy economy/good jobs in the 2016 and 2019 surveys. In the 2016 survey, Fresh, healthy, and affordable foods close to where you live was listed as fresh and healthy foods close to where you live.

### Figure 8. Top 5 Health Problems, Onondaga County, by Year, 2016, 2019, and 2022

	2016	2019	2022
Addiction to alcohol or drugs	87.4%	84.7%	70.0%
Mental health issues	52.1%	68.4%	67.2%
Ongoing stress*		32.2%	38.9%
Overweight and obesity in adults*		36.0%	35.3%
Infectious diseases	5.3%	11.1%	34.9%

Data note: Responses are listed in the order in which they were selected by respondents to the 2022 survey. \*Ongoing stress was listed as *chronic stress* in the 2019 survey and not included as a response option in the 2016 survey. Overweight and obesity in adults was listed in the 2016 and 2019 versions of the survey as obesity in adults.

# Figure 9. Top 5 Health Behaviors or Social Factors Impacting Health, Onondaga County, by Year, 2016, 2019, and 2022

Data note: Responses are listed in the order in which they were selected by respondents to the 2022 survey. \*Neighborhood violence, gun violence, and alcohol abuse were added as response options to the 2022 survey and therefore not comparable to prior versions of the survey. Discrimination was added as a response option to the 2019 survey and not included in the 2016 survey.

# Figure 10. Top 5 Healthcare System Issues Impacting Health, Onondaga County, by Year, 2016, 2019, and 2022

	2016	2019	2022
Access to mental health services	64.0%	71.2%	70.4%
High cost of healthcare	63.7%	73.9%	65.0%
High cost of prescription medications	55.0%	60.8%	51.2%
Long wait to get an appointment*			41.7%
Access to a regular doctor or healthcare provider	36.7%	39.2%	39.4%

Data note: Responses are listed in the order in which they were selected by respondents to the 2022 survey. \*Long wait to get an appointment was added as response options to the 2022 survey and therefore not comparable to prior versions of the survey.

# Figure 11. Top 5 Experiences Accessing Healthcare, Onondaga County, by Year, 2016, 2019, and 2022

	2019	2022
Long wait to get an appointment	44.9%	49.4%
Difficulty getting to a medical appointment due to office hours	29.1%	30.0%
Wait time in the healthcare provider's office impacted your ability to meet your obligations	29.7%	26.7%
Feeling like your healthcare provider is not listening	25.2%	24.2%
Feeling like your healthcare provider is not spending enough time with you	26.8%	23.4%

*Data note: Responses are listed in the order in which they were selected by respondents to the 2022* survey. This question was introduced to the survey in 2019, therefore there are no comparison data available for 2016.

### **IMPACT OF THE COVID-19 PANDEMIC**

For each of the topic areas, please note what your life is like now compared to your life before the COVID-19 pandemic.

### **Quality of Life**

In this section of the survey, respondents were asked to indicate how the COVID-19 pandemic impacted aspects of health and quality of life in Onondaga County. Most questions focused on how aspects of life either improved or worsened during the pandemic. Figure 12 below displays responses for several quality-oflife categories in which respondents were asked to identify whether their life in that area "got better," "stayed the same," or "got worse" due to the COVID – 19 pandemic.

### Figure 12. Impact of the COVID-19 Pandemic on Quality of Life, Onondaga County

Got better 🗧 Stayed the same 🧧 Got worse			
	Got better	Stayed the same	Got worse
Feelings of isolation (feeling alone) (n=2837)	8.4%	31.7%	60.0%
Education/school environment (n=2436)	9.4%	31.7%	58.9%
Your mental health (n=3085)	8.0%	38.2%	53.8%
Closeness with friends and family (n=3136)	12.9%	34.3%	52.9%
Ability to get emergency healthcare (n=2505)	7.4%	44.0%	48.6%
Ability to get childcare (n=1482)	10.5%	43.4%	46.1%
Ability to get essential items (groceries, clothing, etc.) (n=3044)	7.3%	47.8%	44.9%
Job or work environment (n=2942)	15.3%	39.9%	44.9%
Your physical health (n=3110)	13.2%	43.5%	43.3%
Ability to get preventive healthcare (primary care, annual doctor appointments, etc.) (n=3031)	6.3%	51.8%	41.9%
Financial situation (n=3051)	14.1%	46.3%	39.6%
Ability to get stable and affordable housing (n=2290)	6.6%	54.5%	38.9%
Ability to use public transportation (buses, trains, taxis, etc.) (n=1431)	10.8%	54.8%	34.5%

Data note: The "n" provided in the chart above corresponds to the number of responses to that specific question after excluding blank responses and responses of "does not apply."

For several categories, the majority of respondents indicated their life *got worse* due to the COVID-19 pandemic. These included the following:

- Feelings of isolation (60.0%)
- Education/school environment (58.9%)
- Mental health (53.8%)
- Closeness with friends and family (52.9%)
- Emergency healthcare access (48.6%)
- Childcare access (46.1%)
- Job or work environment (44.9%)

The areas where respondents were most likely to report their lives stayed the same were in use of public transit (54.8%) and stable and affordable housing (54.5%).

#### Substance Use

Please note how your use of alcohol, tobacco, and drugs has changed since before the COVID-19 pandemic.

Figure 13 looks at the impact the COVID-19 pandemic had upon the use of the following substances: tobacco, marijuana, electronic cigarettes, illegal drugs, and alcohol. Respondents were asked to identify if their use of these products "decreased," "increased," or had "no change." Those who do not utilize any of these substances were given the opportunity to select "does not apply." Respondents were also given the option not to answer.

# Figure 13. Impact of the COVID-19 Pandemic on Smoking, Substance Use, and Alcohol Use, Onondaga County

Decreased 🔜 No Change 📒 Increased			
	Decreased	No Change	Increased
Smoking or tobacco use (cigarettes, hookah, chewing tobacco, etc.) (n=667)	13.5%	46.9%	39.6%
Marijuana use (n=718)	10.2%	50.3%	39.6%
Electronic cigarette use (vaping) (n=531)	9.6%	51.0%	39.4%
Illegal drug use (n=440)	12.0%	55.9%	32.0%
Drinking alcohol (n=2234)	13.2%	55.6%	31.2%

Data note: The "n" provided in the chart above corresponds to the number of responses to that specific question after excluding blank responses, responses of "does not apply," and responses of "prefer not to answer."

Respondents were most likely to indicate that they had increased use of tobacco (39.6%) and marijuana (39.6%) and least likely to report drinking alcohol at an increased rate (31.2%). The majority of respondents selected "no change" for each of the substances listed. Illegal drug use had the highest percent of respondents selecting "no change," (55.9%).

#### **Future Concerns**

When it comes to COVID-19, what are you most concerned about moving forward?

Next respondents were asked about their greatest concern for the future in regard to COVID-19. Respondents were only allowed to select one response for this question. The most frequently selected response was learning gaps in school age children (15.8%) followed by concerns that they or their loved ones would become infected by COVID-19 (14.2%). The third most common response was concerns over future political division or unrest (14.0%). Responses were relatively evenly distributed across response categories indicating a wide array of concerns among County residents.

### Figure 14. Top concern about COVID-19 moving forward (n=3,224)

15.8%	Learning gaps in school-age children
14.2%	Me or my loved ones becoming infected with COVID-19
14.0%	Political division or unrest
11.9%	Loosening of restrictions (mask use, vaccination requirements, mandatory testing)
10.0%	The health of my community as the pandemic continues
9.8%	Possible harm to the economy
8.2%	Other variants similar to Delta or Omicron
7.6%	Long COVID (COVID symptoms that last beyond 4 weeks)
5.1%	Other (please specify)
3.4%	Access to vaccine boosters

Respondents were also given an opportunity to share open-ended feedback about how COVID-19 impacted the long-term health of our community. The majority of qualitative responses to this question focused on social and community-based factors. Nearly 100 of these comments focused on division in politics and values, mistrust of government or political systems, and the politicization of science. Some respondents elaborated indicating that political division has caused substantial division between families and friends.

### I believe it has impacted the mental health above all. Yes the loss of life has been absolutely heartbreaking, but the mental stress is going to continue especially because of the political divide." – Community Health Survey Respondent

Concerns relating to mental health were pervasive in the qualitative feedback received. Many cited concerns relating to disruptions in education and how these would impact children's mental and emotional health. Isolation for individuals of all ages was also mentioned as a cause for concern, one which had potential to impact mental health into the future.

### CONCLUSION

### **Items for Action**

Through this comprehensive community engagement process, community members shared their thoughts and feelings regarding the current health status of Onondaga County as well as concerns for the future. Notably, in this iteration of the survey, participants were also engaged around the topic of the COVID-19 pandemic and its impact on several aspects of life within Onondaga County.

Following a thorough analysis of survey responses, it is clear that the most pressing concerns of community members include:

- Substance use disorders
- Mental health conditions
- Trauma and violence
- Access to health care

Other topics including a clean environment, good and safe schools, and ongoing stress were also frequent concerns. There were also several comments shared in the qualitative portions of the survey indicating public safety (including safe places to play), discrimination and bias from law enforcement, political division were significant challenges impacting the health and quality of life of residents.

Regarding COVID-19, many indicated that their quality of life was significantly impacted by the pandemic. The most significant future concern was disruptions to education which may result in learning gaps for school aged children. Many also expressed concern over mental health challenges resulting from or exacerbated by the pandemic.

These findings were utilized to inform the development of the 2022 – 2024 Onondaga County Community Health Improvement Plan. In addition, these results are being shared with the intention of informing future public health interventions and policy changes that will support Onondaga County residents in attaining health and well-being.

# Appendix 1: Community Health Survey

What do you think about the health of our community? If you are 18 or older and live in Onondaga County, we want to hear from you! Please take this 15 minute survey and help us learn more. We will <u>not</u> share your answers with anyone.

This survey is part of a "Community Health Assessment." A key part of this is hearing about the health issues that are important to you. The Onondaga County Health Department will use this information to work on ways to improve the health of people who live here. If you receive this survey more than once, please only take it one time.

At the end of this survey you can enter a drawing to win one of five (5) \$50 gift cards to Target.

Please complete and return this survey by **Friday, May 13, 2022.** The mailing address is on the last page.

OR you can complete the survey online by visiting **www.surveymonkey.com/r/OCHDCHA2022** or scanning the QR code to the right.

Thank you for your thoughts and feedback!

# Start Survey:

## WHERE DO YOU LIVE?

- 1. Do you live in Onondaga County?
  - □ Yes
  - No {If no, please do not complete this survey. It is for Onondaga County residents only.}
- 2. Do you live in the City of Syracuse?
  - □ Yes
  - 🗆 No

# **HEALTHY COMMUNITY**

A healthy community can improve the health and quality of life of all the people who live here.

3. Please select the five (5) things you believe are the most important for a healthy community.

### Healthy Community

- A clean environment (no pollution or trash in public spaces including parks, playgrounds, and lakes)
- □ A good economy / good jobs
- Access to health care (doctors, hospitals, etc.)
- □ Arts and cultural events
- Community spaces (libraries, community centers, etc.) close to where you live
- □ Family and other social support
- □ Fresh, healthy, and affordable foods close to where you live
- Good and safe schools
- □ High quality, affordable day care
- Higher education opportunities (apprentice programs, colleges, universities)
- □ Low crime rates
- □ Neighborhood safety
- Parks and outdoor places to exercise and play

- □ Positive race / ethnic relations
- Public spaces and events that are for people of all physical abilities
- Public transportation (buses, trains, taxis, etc.)
- □ Religious or spiritual values
- Roads that are safe for people who walk or ride their bike (sidewalks, crosswalks, bike lanes)
- □ Safe and affordable housing
- Social connectedness (a strong sense of community)
- Social policies and programs (parental leave, social security, health insurance, etc.)
- □ Strong infrastructure (roads, bridges, water pipes, etc.)
- □ Strong voter registration/turn out
- □ Other (please specify):

4. Please share any more feedback on what you believe makes a healthy community.

ongovhealth Onondaga County Health Department

# **HEALTH PROBLEMS**

Health problems are diseases, medical conditions, or environmental factors that can affect a person's health.

5. Please select the five (5) biggest <u>health problems</u> you believe our community is currently facing.

### Health Problems

- $\hfill\square$  Accidents or injuries at work
- □ Addiction to alcohol or drugs
- $\Box$  Air pollution
- Alzheimer's disease, dementia, or memory loss
- □ Asthma or other breathing problems
- □ Babies born too small or too soon
- □ Cancer
- □ Ongoing stress
- Death among babies and children
- Developmental delays in children (physical, speech, learning or social/emotional)
- □ Diabetes
- □ Diseases spread by insects (Lyme disease, EEE, West Nile virus, etc.)
- □ Heart disease and stroke
- □ High blood pressure
- □ HIV / AIDS
- □ Infectious diseases (COVID-19, flu, hepatitis, TB, etc.)
- □ Injury or falls in seniors

- □ Lead poisoning in children or homes
- Maternal mortality (death among new mothers)
- Mental health issues (anxiety, depression, etc.)
- $\hfill\square$  Overweight and obesity in adults
- $\hfill\square$  Overweight and obesity in children
- Postpartum depression (depression in mothers after a baby is born)
- □ Pre-mature death (deaths before age 65)
- Problems with teeth or gums
- □ Secondhand smoke
- □ Sexually transmitted infections (syphilis, chlamydia, gonorrhea, etc.)
- □ Suicide
- □ Teenage pregnancy
- Unsafe drinking water
- □ Other (please specify):

6. Please share any more feedback you have on health problems in our community.

# HEALTH BEHAVIORS AND SOCIAL FACTORS

Health behaviors are actions taken by people that can change their health. Social factors are experiences that impact a person's lifestyle, including their ability to be healthy.

7. Please select the five (5) <u>health behaviors or social factors</u> you believe are the biggest problems for our community.

## Health Behaviors and Social Factors

- □ Alcohol abuse
- Discrimination (based on age, gender, physical ability, race, religious beliefs, sexual preference, etc.)
- □ Drinking and driving
- □ Electronic cigarette use (vaping)
- □ Emotional or physical abuse
- □ Food insecurity (not having enough food to eat)
- Gun violence
- □ Homelessness
- Illegal drug use (opioid, fentanyl, other illegal drugs)
- □ Lack of medical care during pregnancy
- □ Low literacy (difficulty reading or understanding written words)
- Marijuana use
- Neighborhood violence (gang or drug related, etc.)

- □ Not getting enough physical activity
- Not getting vaccines (shots) to prevent disease
- □ Racism
- □ Sexual assault (including rape)
- □ Smoking or tobacco use (cigarettes, hookah, chewing tobacco, etc.)
- $\hfill\square$  Social isolation
- $\hfill\square$  Texting and driving
- Unhealthy eating
- Unprotected sexual activity (not using condoms or other barrier method)
- Unsafe sleep environments for infants/babies
- □ Unsafe working conditions
- □ Other (please specify):

8. Please share any more feedback you have on health behaviors or social factors in our community.

# **HEALTHCARE SYSTEM**

The healthcare system is made up of people, organizations, and resources that provide healthcare services to the community to meet their healthcare needs. Healthcare system issues are factors that prevent people in our community from getting healthcare when they need it.

9. Please select the five (5) <u>healthcare system issues</u> you believe are the biggest problems in our community.

### Health System Issues

- $\hfill\square$  Access to a dentist
- Access to a regular doctor or healthcare provider
- □ Access to language translators
- $\hfill\square$  Access to mental health services
- Access to preventive health screenings (mammograms, colorectal cancer screening, etc.)
- □ Access to substance use disorder treatment (for drugs or alcohol)
- □ Access to vaccinations (COVID-19 vaccines, flu shots, etc.)
- Discrimination or bias from medical providers

- □ High cost of healthcare
- □ High cost of prescription medications
- □ Lack of empathy among providers
- □ Lack of health or dental insurance coverage
- □ Lack of transportation to medical appointments (car, bus, ride from a friend, etc.)
- □ Long wait to get an appointment
- Not understanding health information from a medical provider (after leaving the hospital or during a medical appointment)
- □ Other (please specify):
- 10. Please share any more feedback you have on health system issues in our community.

# ACCESS TO CARE

Access to care refers to the ease with which a person can get needed medical services. Access to medical care impacts a person's health.

11. Which of the following have you, or your family, experienced when seeking medical care in the <u>last</u> <u>3 years</u>? (Select <u>all</u> that apply.)

### Access to Care Issues

- Difficulty getting to a medical appointment due to lack of transportation
- Difficulty getting to a medical appointment due to lack of childcare
- Difficulty getting to a medical appointment due to location
- Difficulty getting to a medical appointment due to not having sick leave at work
- Difficulty getting to a medical appointment due to office hours
- Feeling like your healthcare provider does not understand you or your experience
- □ Feeling like your healthcare provider is not listening
- □ Feeling like your healthcare provider is not spending enough time with you
- Having difficulty finding a healthcare provider who accepts your insurance

- □ High cost prevented you from seeking needed medical care
- □ Long wait to get an appointment
- Not having health insurance prevented you from receiving needed medical care
- Not having your language or translations needs met
- Not understanding health information from your healthcare provider
- □ Seeing a different healthcare provider each time you go to the doctor's office
- □ Stigma or discrimination/feeling judged by your healthcare provider
- Wait time in the healthcare providers' office impacted your ability to meet your obligations (work, family, etc.)
- □ None of the above
- □ Other (please specify):

# **IMPACT OF COVID-19**

The COVID-19 pandemic has impacted many aspects of health and quality of life in our community.

12. For each of the topic areas below, please note what <u>your life</u> is like **now** compared to <u>your life</u> **before** the COVID-19 pandemic.

	Got worse	Stayed the same	Got better	Does not apply
Ability to get childcare				
Ability to get emergency healthcare				
Ability to get essential items (groceries, clothing, etc.)				
Ability to get preventive healthcare (primary care, annual doctor appointments, etc.)				
Ability to get stable and affordable housing				
Ability to use public transportation (buses, trains, taxis, etc.)				
Closeness with friends and family				
Education/school environment				
Feelings of isolation (feeling alone)				
Financial situation				
Job or work environment				
Your mental health				
Your physical health				

13. Please note below how your use of alcohol, tobacco, and drugs has changed since before the COVID-19 pandemic.

	Decreased	No change	Increased	Does not apply	Prefer not to answer
Drinking alcohol					
Electronic cigarette use (vaping)					
Illegal drug use					
Marijuana use					
Smoking or tobacco use (cigarettes, hookah, chewing tobacco, etc.)					

14. When it comes to COVID-19, what are you most concerned about moving forward?

(Please select 1 response)

- $\hfill\square$  Access to vaccine boosters
- □ Learning gaps in school-age children
- □ Loosening of restrictions (mask use, vaccination requirements, mandatory testing)
- □ Long COVID (COVID symptoms that last beyond 4 weeks)
- $\hfill\square$  Me or my loved ones becoming infected with COVID-19
- $\hfill\square$  Other variants similar to Delta or Omicron
- Political division or unrest
- $\hfill\square$  Possible harm to the economy
- $\hfill\square$  The health of my community as the pandemic continues
- □ Other (please specify):

15. Please share any more feedback you have on how COVID-19 impacted the **long-term** health of our community

16. Please note how you feel the Onondaga County Health Department (OCHD) performed in the following areas during the COVID-19 pandemic?

	Poor	Fair	Good	Excellent	Not applicable
Sharing information/data with the community in a timely manner					
Providing guidance on isolation and quarantine (in the community and schools)					
Providing guidance on mask requirements (in the community and schools)					
Providing testing in the community (including schools)					
Vaccinating the community					

### 17. Please share any more feedback you have on how OCHD responded to the COVID-19 pandemic.

# **DEMOGRAPHICS\***

Understanding how people from different backgrounds feel about health issues in our county can help us plan the best ways to improve health. Your information will not be shared or used to identify you in any way.

- 18. Your age:
  - □ 18-34
  - □ 35-49
  - □ 50-64
  - $\hfill\square$  65 and older
  - □ I prefer not to answer
- 19. Your ethnicity:
  - □ Hispanic or Latinx
  - □ Not Hispanic or Latinx
  - Don't know / Not sure
  - □ I prefer not to answer
- 20. Your race: (select all that apply)
  - American Indian or Alaska Native
  - □ Asian or Asian American
  - Black or African American
  - Middle Eastern or North African
  - □ Native Hawaiian or Pacific Islander
  - □ White
  - Don't know / Not sure
  - □ I prefer not to answer
  - □ Another race not listed above (please specify if comfortable):

- 21. Which of the following best describes you?
  - 🗆 Woman
  - 🗆 Man
  - □ Non-binary
  - □ Agender
  - Gender fluid
  - □ Gender queer
  - □ I prefer not to answer
  - Prefer to self-describe (please specify if comfortable):
- 22. Are you transgender?
  - 🗆 No
  - □ Yes
  - □ I prefer not to answer
- 23. Your highest education level
  - □ Less than high school
  - □ High school graduate or GED
  - □ Some college, no degree
  - □ 2 year college degree
  - □ 4 year college degree or higher
  - $\hfill\square$  I prefer not to answer

ongovhealth Onondaga County Health Department 24. Do you have a long-lasting or chronic condition (such as physical, visual, auditory, cognitive, emotional, or other) that requires ongoing accommodations for you to conduct daily life activities?

- 🗆 No
- □ Yes
- □ I prefer not to answer

25. The zip code where you live:

### **Responses by Residential Zip Code**

**Data Notes:** The response options shown above (i.e., access to health care) are those which were most frequently selected by "all respondents" and may not correspond to the top issue for a specific demographic category. For each demographic category above, a value for "all respondents" is also provided for comparison. Demographic categories with fewer than 10 responses were suppressed due to small numbers. *Rest of County* represents County residents that reside outside of the City of Syracuse.

Please note due to small numbers and high percentages of unknown or blank responses, these data should be interpreted with caution. See the table on page 5 of this report for information on the number of respondents in each demographic category.
