Answer all of the following questions in Part 2 using the information contained in Part 1 and other materials submitted by the project sponsor or otherwise available to the reviewer. 1. Will the proposed action create a material conflict with an adopted land use plan or zoning regulations?	<input checked="" type="checkbox"/>	<input type="checkbox"/>
2. Will the proposed action result in a change in the use or intensity of use of land?	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Short Environmental Assessment Form

Part 3 Determination of Significance

For every question in Part 2 that was answered "moderate to large impact may occur", or if there is a need to explain why a particular element of the proposed action may or will not result in a significant adverse environmental impact, please complete Part 3. Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Part 3 should also explain how the lead agency determined that the impact may or will not be significant. Each potential impact should be assessed considering its setting, probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short-term, long-term and cumulative impacts.

The action merely involves the acquisition of a vacant parcel of land for Consolidated Sanitary District (CSD) and municipal purposes. The County's Department of Water Environment Protection (WEP) currently lacks suitable property in this area; which it presently requires due to current and anticipated residential, industrial and commercial development and population increases in the Town of Clay and surrounding geography. Given the current availability of the referenced parcel, the general lack of available land in the area, the current real estate market, and departmental needs; WEP is desirous of obtaining the land as soon as practicable and irrespective of any future wastewater infrastructure projects or phases. Such is functionally independent of a future proposed project to construct/install/expand wastewater infrastructure in this area and region to meet anticipated future demands, which project is currently undergoing SEQRA review and agency consultations, and is no less protective of the environment considering that a SEQRA review would need to be completed prior to any intrusive site activities (in addition to the public notice and hearing requirements for such wastewater projects under 11-A of the County Administrative Code) or future use of said parcels.

Based on the foregoing, the County has determined that the above-stated action is an Unlisted Action that will not result in any significant adverse environmental impacts. Therefore, in accordance with Article 8 of the Environmental Conservation Law, the County hereby issues this negative declaration.

<input type="checkbox"/> Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action may result in one or more potentially large or significant adverse impacts and an environmental impact statement is required.
