Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Part 3 should also explain how the lead agency determined that the impact may or will not be significant. Each potential impact should be assessed considering its setting, probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short-term, long-term and cumulative impacts.

The County of Onondaga is proposing to sell approximately .447 acres of surplus County highway property in the Town of Geddes, identified as Manager's Way (C.R. 221), located between I-690, I-90, and the railroad tracks westward of Van Vleck Road, as shown on the attached County Road Map. The roadway section is isolated, barricaded at one end, and rarely used by the public. The proposed action involves only the transfer of surplus County highway property to the sole adjoining owner for use thereof. As such, the County issues this negative declaration for purposes of Article 8 of the Environmental Conservation Law because the sale of the property is an Unlisted Action which will not result in any significant adverse environmental impacts.

<input type="checkbox"/> Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action may result in one or more potentially large or significant adverse impacts and an environmental impact statement is required.
