This Annex details the hazard mitigation elements specific to the Town of DeWitt, a participating jurisdiction to the 2025 Onondaga County Hazard Mitigation Plan update. This Annex is not intended to be a standalone document but supplements the information contained in **Volume 1** (Countywide Planning Elements). Therefore, all sections of **Volume 1** including the planning process, hazard identification and risk assessment, mitigation strategy (includes mitigation goals and objectives), and plan maintenance apply to and were met by the Town of DeWitt. This Annex provides additional information specific to the Town, with a focus on providing additional details on the hazard risk assessment and mitigation strategy (i.e., mitigation actions) for this community.

1. HAZARD MITIGATION LOCAL PLANNING TEAM

The following individuals have been identified as the Town of DeWitt Local Planning Team for the 2025 Onondaga County Hazard Mitigation Plan. These individuals participated in all aspects of the planning process and developed a risk and vulnerability assessment, capability assessment, and mitigation strategy (including mitigation actions) specific to the jurisdiction.

Name	Title	Department
Ilana Cantrell	Director	Planning and Zoning Department
Doug Miller	Town Engineer	Miller Engineers
Rocco Conte	Highway Superintendent	Highway Department
Benton White	Captain	Police Department

2. MUNICIPAL PROFILE

The Town of DeWitt lies just east of the center of Onondaga County in central New York State. The Village of East Syracuse is located within the Town to the east of the Eastwood neighborhood of the City of Syracuse. There are several communities located within the Town – Collamer (hamlet), DeWitt (hamlet), Franklin Park (hamlet), Lyndon Corners (hamlet), Jamesville (hamlet), and DeWitt Acres.

The Town of DeWitt has a total area of 33.9 square miles. The Town is the home for most of the campus and all of the academic buildings of Le Moyne College. The northern portion of the Town is developed with a mixture of industrial, commercial and residential sections and the central portion is primarily residential. The southern, hilly portion is generally mixed forests and fields with limited residential development and stone quarry operation. The major streams in the Town are Ley Creek and Butternut Creek.

Interstate 481 is the major highway in DeWitt crossing the center of the Town, turning northward along the east side of DeWitt. Interstate 481 intersects Interstate 690 in the eastern part of the Town and Interstate 90 (New York State Thruway) in the northern part. New York State Route 92 is conjoined with New York State Route 5 intersects Interstate 481 in the east of DeWitt. New York State Route 91 has its northern terminus at New York State Route 173, which crosses the southern part of the Town, at Jamesville. New York State Route 298 crosses the north part while New York State Route 290 crosses the middle portion of the Town. Other state routes of note include New York State Route 598 in the northwest portion of the Town and New York State Route 635 which straddles the Town's western boundary with the City of Syracuse. The Town of DeWitt is bordered to the north by the Town of Cicero, to the south by the towns of Lafayette and Pompey, to the east by the Town of Manlius, and to the west by the City of Syracuse, and the towns of Onondaga and Salina.

2.1. Population

In 2023, the Town of DeWitt had a population of 25,312, a 0.2% decrease from the estimated 2018 population of 25,363. **Table 1** summarizes population distribution between 2010 and 2023, and the percentage of the 2023 population that is under five (5) years old, over 65 years old, and living below poverty level.

	Poj	pulation		Unc	lerserved Populati	on
2010 ¹	2018 ²	2023 ³	Population Change (2018 – 2023)	Youth ³ (Under 5 years old)	Elderly ³ (Over 65 years old)	Below Poverty Level ³
25,838	25,363	25,312	-0.2%	4.6%	19.7%	8.0%

Table 1.Population Trends

2.2. History and Cultural Resources

The Town of DeWitt's history dates to the Revolutionary War when soldiers were offered 500 acres of virgin land in exchange for three (3) years of military service. DeWitt was created in 1835 by the division of Manlius. The name honors Major Moses DeWitt, judge and soldier. DeWitt's growth reflects the adventurous spirit of the industrial revolution. The Erie Canal opening in 1825 was followed closely by railroad construction through East Syracuse in 1839. Together these events populated the Town of DeWitt with over 2,800 residents as people and commerce moved west. The Syracuse and Utica Railroad became the major east/west transportation route. In northern DeWitt, the New York Central Railroad bought land in 1872 for its rail yards in what would become the incorporated Village of East Syracuse. The earliest pioneers settled three (3) hamlets – Morehouse Flats (above the present day hamlet of Jamesville), Youngsville (later to be named Orville and now central DeWitt), and Britton's Settlement at the present day Collamer hamlet. Expansive residential growth followed both world wars, with DeWitt's population peaking in 1970 at 29,000 people. Le Moyne College and the Hancock Field Air National Guard Base, half of the Syracuse Hancock International Airport, and the Onondaga County Department of Correction are located within the Town of DeWitt.

While the Town's population is just under 23,000, the Town estimates that roughly 40,000 people are employed within the Town. The Town estimates that 46% of all industrial acreage in the County is found within DeWitt.

3. GROWTH/DEVELOPMENT TRENDS

Understanding development trends can help evaluate whether the jurisdiction's vulnerability has increased, decreased, or remained the same. **Table 2** summarizes the total housing units built in the Town of DeWitt between 2019 and 2023.⁴

⁴ Data provided by the Onondaga County Department of Planning based on Real Property Data (2024).

Туре	2019	2020	2021	2022	2023
Single-Family Units	5	10	5	6	5
Multi-Family Units	0	220	0	0	0
2-Family Units	0	0	0	0	0
3-Family Units	0	0	0	0	0
Apartment Units	0	220	0	0	0
Total Units	5	230	5	6	5

Table 2.Housing Units Built (2019 - 2023)

The Onondaga County Housing Needs Assessment, a component of the County's Comprehensive Plan, explores the County's housing market and its challenges in greater depth and argues that one of the County's greatest housing needs is an improved approach to land use planning. In the Assessment, it is stated that there are similarities and affinities between certain groups of municipalities. Therefore, the County was sub-divided into seven (7) sub-regions, each of which covers multiple municipalities. The municipalities within each sub-region share sufficient geographic and market characteristics to be treated as a single place for purposes of further understanding the County housing market.

The Town of DeWitt is in the Outer Ring East sub-region. Total household growth between 2000 and 2020 was 8.0% which is below the average of all the towns within the County (the average of all the County towns/villages was 12.0%). If demand continues to grow in the County, Outer Ring East is well positioned to capture a share of the growth. Overbuilding typical single-family for sale products is a potential threat to market health as household growth tilts in the direction of rental while the growth in owner households comes from smaller and older households. Under a low growth scenario, it is likely that Outer Ring East would see a decrease in the total number of homeowners and a growing number of renter households. It is also likely that some conversion of owner-occupied houses to rental could occur. Market changes would happen gradually, with strong areas remaining strong for longer, and new single-family development would maintain a feeling of growth and success if it occurs. The degree and speed of stagnation, and possible market decline, would be dependent on the amount of typical sprawling ownership housing development in the County. The greater the number of units built for the ownership market, the higher the risk of rental conversion or vacancy of formerly owner-occupied houses.

The Town of DeWitt is almost completely built out. Over the last five (5) years almost all developments have been redevelopment. Over the next five (5) years almost all development will continue to be redevelopment or small infill development. **Table 3** summarizes major recent residential/commercial development (in the past five (5) years), and any known or anticipated major residential/commercial development and major infrastructure development, as of December 2024, that is likely to occur within hazard prone areas in the next five (5) years.

Table 3.	Growth and Development
----------	------------------------

Property or Development Name	Location	Type (e.g., residential, commercial)	# of Units/ Structures	Known Hazard Zone(s)	Status of Development		
Recent Development in the Past Five (5) Years (2019 – 2024)							
The Town	The Town has not experienced significant development in hazard prone areas over the past five (5) years.						
Known or Anticipated Development in the Next Five (5) Years (2024 – 2029)							
The Town	The Town does not anticipate significant development in hazard prone areas over the next five (5) years.						

3.1. Changes in Priority

The overall hazard mitigation priorities have not significantly changed for the Town of DeWitt since the last Plan update. However, mitigation actions from the previous Plan were updated, and a more concerted effort on achieving equitable outcomes for all communities, including underserved communities and socially vulnerable populations, has been implemented.

4. CAPABILITY ASSESSMENT

Federal regulations require hazard mitigation plans to identify goals for reducing long-term vulnerabilities to the identified hazards in the planning area (Section 201.6(c)(3)(i)). A critical step in the development of specific hazard mitigation actions and projects is assessing existing authorities, policies, programs, and resources and capabilities to use or modify local tools to reduce losses and vulnerability from profiled hazards.

A capability assessment was conducted for the Town of DeWitt's authorities, policies, programs, and resources. Goals and mitigation actions were developed using input from this assessment. Information regarding the Town's implementation of and continued participation in the National Flood Insurance Program (NFIP) can be found in Section 5 of this Annex.

The Local Planning Team assessed the Town's capabilities that can contribute to the reduction of long-term vulnerabilities to hazards. The capabilities include the following categories:

- Planning and Regulatory Capabilities
- Administrative and Technical Capabilities
- Fiscal Capabilities
- Education and Outreach Capabilities

Additionally, ways to expand on and improve these existing policies and programs to integrate hazard mitigation into the day-to-day activities and programs of the Town were considered.

4.1. Planning and Regulatory Capabilities

Table 4 includes local ordinances, policies, and laws to manage growth and development (e.g., land use plans, capital improvement plans, transportation plans, emergency preparedness and response plans, building codes, and zoning ordinances).

Capability Category	Yes/No	Authority (local, county, state, federal)	Responsible Department/ Agency	Code Citation and Comments (e.g., Code Chapter, name of plan, explanation of authority, etc.)		
Planning Capability						
Comprehensive Plan	Yes	Local	Planning and Zoning	Chapter 192 of the Town Code The Town of DeWitt Comprehensive Plan was last updated in 2017.		

Table 4.Planning and Regulatory Tools

Capability Category	Yes/No	Authority (local, county, state, federal)	Responsible Department/ Agency	Code Citation and Comments (e.g., Code Chapter, name of plan, explanation of authority, etc.)
Capital Improvements Plan	No	N/A	N/A	N/A
Floodplain Management / Basin Plan	No	N/A	N/A	N/A
Stormwater Management Plan	Yes	Local	Planning and Zoning	Member of the Central New York (CNY) Stormwater Coalition
Open Space Plan	Yes	Local	Planning and Zoning	DeWitt Parks & Recreation Master Plan
Stream Corridor Management Plan	Yes	Local	Planning and Zoning	Chapter 160, Section 160-8 (D) of the Town Code
Watershed Management or Protection Plan	No	N/A	N/A	N/A
Economic Development Plan	No	N/A	N/A	N/A
Comprehensive Emergency Management Plan	Yes	Local	Planning and Zoning	DeWitt Police Manual Order #407
Emergency Operation Plan	Yes	Local	Planning and Zoning	DeWitt Police Manual Order #407, 408, 409, 410
Evacuation Plan	No	N/A	N/A	N/A
Post-Disaster Recovery Plan	No	N/A	N/A	N/A

Strategic Recovery Planning Report	No	N/A	N/A	N/A
Climate Adaptation Plan	Yes	Local	Planning and Zoning	DeWitt Sustainability Plan (2014)
Resilience Plan	No	N/A	N/A	N/A
Urban Forestry Management Plan	Yes	Local	Planning and Zoning	Updated in 2016
Jamesville Hamlet Master Plan	Yes	Local	Planning and Zoning	Updated in 2019
Emerald Ash Borer Management Plan	Yes	Local	Planning and Zoning	Updated in 2014
Deer Management and Education Plan	Yes	Local	Planning and Zoning	Updated in 2021
		Regulatory Ca	apability	
Building Code	Yes	State, Local	Planning and Zoning	Chapter 16 of the New York State Building Code
				Chapter 94 of the Town Code

Capability Category	Yes/No	Authority (local, county, state, federal)	Responsible Department/ Agency	Code Citation and Comments (e.g., Code Chapter, name of plan, explanation of authority, etc.)
Zoning Ordinance	Yes	Local	Planning and Zoning	Chapter 192 of the Town Code
Subdivision Ordinance	Yes	Local	Planning and Zoning	Chapter 164 of the Town Code
NFIP Flood Damage Prevention Ordinance	Yes	Federal, State, Local	Planning and Zoning	Chapter 100 of the Town Code
NFIP: Cumulative Substantial Damages	No	N/A	N/A	N/A
NFIP: Freeboard	Yes	State, Local	Planning and Zoning	Chapter 16 of the New York State Building Code State mandated two (2) feet above the BFE for all construction, both residential and non-residential.
Growth Management Ordinances	No	N/A	N/A	N/A
Site Plan Review Requirements	Yes	Local	Planning and Zoning	Chapter 192 of the Town Code
Stormwater Management Ordinance	Yes	Local	Planning and Zoning	Chapter 160 of the Town Code
Municipal Separate Storm Sewer System (MS4)	Yes	Local	Planning and Zoning	Permits are required for stormwater discharges from MS4s in urbanized areas and for construction activities disturbing one (1) or more acres. The Town has been automatically designated as a regulated MS4 and required to develop a comprehensive stormwater management program.
Natural Hazard Ordinance	No	N/A	N/A	N/A
Post-Disaster Recovery Ordinance	No	N/A	N/A	N/A
Real Estate Disclosure Requirement	Yes	State	New York State Department of State, Real Estate Agent	New York Code – Article 14 §460- 467 (Property Condition Disclosure Act)
Other (Special Purpose Ordinances [i.e., sensitive areas, steep slope])	No	N/A	N/A	N/A

4.2. Administrative and Technical Capabilities

The administrative and technical capabilities, listed in **Table 5**, include community (i.e., public and private) staff and their skills and tools, which can be used for mitigation planning and implementation. This capability includes engineers, planners, emergency managers, Geographic Information System (GIS) analysts, building inspectors,

grant writers, and floodplain managers. Small communities may rely on other government entities, such as counties or special districts, for resources.

Capability	Yes/No	Position/Department/Agency
Admir	nistrative Capa	ıbility
Planning Board	Yes	Planning & Zoning Department
Mitigation Planning Committee	Yes	Town Supervisor Town Engineer Highway Superintendent Police Department Planning & Zoning Department
Environmental Board/Commission	Yes	DeWitt Advisory Conservation Commission (DACC)
Open Space Board/Committee	Yes	DeWitt Advisory Conservation Commission (DACC)
Economic Development Commission/Committee	No	N/A
Maintenance programs to reduce risk	Yes	Planning and Zoning Department Highway Department Parks & Facilities Department Tree Committee Ordinance Chapter 175
Mutual aid agreements	Yes	Highway Department Water Department
Technic	al/Staffing Caj	pability
Planner(s) or engineer(s) with knowledge of land development and land management practices	Yes	Engineering Consultants Planning and Zoning Director Environmental Planner
Engineer(s) or professional(s) trained in construction practices related to buildings and/or infrastructure	Yes	Engineering Consultants Codes Enforcement, Planning and Zoning Department
Planners or engineers with an understanding of natural hazards	Yes	Planning and Zoning Department Town Engineer
NFIP Floodplain Administrator	Yes	Town Engineer
Surveyor(s)	Yes	Town Engineer
Personnel skilled or trained in GIS applications	Yes	Town Engineer Water Department
Scientist familiar with natural hazards	Yes	Town Supervisor
Warning systems/services	Yes	Onondaga County Emergency Communications (911)
Emergency Manager	Yes	Chief of Police, Police Department Highway Superintendent, Highway Department

Table 5. Administrative and Technical Capabilities

Capability	Yes/No	Position/Department/Agency
Grant writer(s)	Yes	Planning and Zoning Department Staff Parks & Facilities Department Staff Town Engineer Police Department Staff Town Clerk Highway Department Staff
Staff with expertise or training in benefit/cost analysis	Yes	Town Engineer Comptroller
Professionals trained in conducting damage assessments	Yes	Code Enforcement Officer(s) Town Engineer Highway Department Staff

4.3. Fiscal Capabilities

Table 6 contains a list of fiscal capabilities available to the Town that may be used to implement mitigation activities to reduce risk and enhance resiliency. This capability includes available funding sources from local budgets, state and federal grants, potential cost-sharing arrangements with private entities, existing insurance policies, and the ability to generate additional revenue through fees and bonds related to mitigation.

Financial Resources	Accessible or Eligible to Use
Community Development Block Grants (CDBG, CDBG-DR)	Yes
Federal Hazard Mitigation Assistance Program (i.e., Hazard Mitigation Grant Program (HMGP), HMGP Post Fire, Building Resilient Infrastructure and Communities (BRIC), Flood Mitigation Assistance (FMA) Program)	Yes
Capital Improvements Project Funding	Yes
Authority to Levy Taxes for specific purposes	Yes
User fees for water, sewer, gas or electric service	Yes
Impact fees for homebuyers or developers of new development/homes	Yes
Stormwater Utility Fee	Yes
Incur debt through general obligation bonds	Yes
Incur debt through special tax bonds	Yes (Special Improvement District)
Incur debt through private activity bonds	No
Withhold public expenditures in hazard-prone areas	No
Other federal or state funding programs	Yes
Open Space Acquisition funding programs	Yes

Table 6.Fiscal Capabilities

4.4. Education and Outreach Capabilities

Table 7 lists the Town's education and public outreach capabilities that can be used to inform residents about potential hazards, educate on mitigation strategies, and encourage proactive actions to reduce the community's

impacts to disasters. These capabilities include fire safety programs, hazard awareness campaigns, public information, and communications offices.

Resource	Yes/No	Position/Department/Agency
Public Information Officer	Yes	
Personnel skilled or trained in website development	Yes	Every Town department has personnel trained
Hazard mitigation information available on the jurisdiction's website	Yes	Water Department Planning and Zoning Department
Utilize social media for hazard mitigation education	Yes	Water Department
Citizen boards or commissions that address issues related to hazard mitigation	Yes	DeWitt Advisory Conservation Commission (DACC)
Other programs already in place that could be used to communicate hazard-related information	Yes	Town Newsletter
An established warning system for hazard events	Yes	Onondaga County Emergency Communications (911)

Table 7.	Education and Outreach Resources
----------	---

4.5. Community Classifications

The community classification relates to the community's ability to provide effective services to lessen its vulnerability to the hazards identified. These classifications can be viewed as a gauge of the community's capabilities in all phases of emergency management (i.e., preparedness, response, recovery and mitigation) and are used as an underwriting parameter for determining the costs of various forms of insurance. **Table 8** summarizes classifications for community programs available to the Town of DeWitt.

Table 8.	Community Classifications
----------	----------------------------------

Program	Yes/No	Classification (if applicable)	Date Classified (if applicable)
Community Rating System (CRS)	No	N/A	N/A
Building Code Effectiveness Grading Schedule (BCEGS)	No	N/A	N/A
Public Protection (ISO Fire Protection Classes 1 to 10)	No	N/A	N/A
New York State Department of Environmental Conservation Climate Smart Community	Yes	N/A	2017
Storm Ready Certification	No	N/A	N/A
Firewise Communities classification	No	N/A	N/A
Natural disaster/safety programs in/for schools	No	N/A	N/A
Organizations with mitigation focus (advocacy group, non-government)	Yes	Onondaga Environmental Institute	N/A
Public-private partnership initiatives addressing disaster-related issues	No	N/A	N/A

4.6. Self-Assessment of Capability

The community classification relates to the community's ability to provide effective services to lessen its vulnerability to the hazards identified. These classifications can be viewed as an indicator of the community's capabilities in all phases of emergency management (i.e., preparedness, response, recovery and mitigation) and are used as an underwriting parameter for determining the costs of various forms of insurance. **Table 9** summarizes classifications for community programs available to the Town of DeWitt.

	Degree of Ha	zard Mitigation Ca	pability
Capability Area	<i>Limited</i> (If limited, what are your obstacles?)	Moderate	High
Planning and Regulatory Capabilities			Х
Administrative and Technical Capabilities			Х
Fiscal Capabilities		Х	
Education and Outreach Capabilities		X	
Community Political Capabilities		X	
Community Resiliency Capabilities	X (Geographical public infrastructure is limited)		
Capability to integrate mitigation into municipal processes and activities		Х	

Table 9.Self-Assessment Capability for the Municipality

4.7. Needs to Expand/Improve Capabilities

Based on the capability self-assessment in Section 4.6, the Town of DeWitt identified existing authorities, policies, programs, funding, and/or resources that need to be expanded and/or improved in order to support the implementation of the hazard mitigation initiatives identified in this Plan (e.g., mitigation actions).

- Town codes and ordinances (e.g., building, zoning, protecting steep slopes, wetlands) should be reviewed based on developing trends in identified hazards and mitigation measures that can make them more effective at preventing losses.
- Update the Town's Sustainability Plan. This Sustainability Plan was developed to provide strategies for achieving the stated goals of the Sustainability Policy, to guide municipal operations, and to provide a framework for community growth and development. However, the Plan has not been updated since 2014.

5. NATIONAL FLOOD INSURANCE PROGRAM

The Town of DeWitt is a member of the National Flood Insurance Program (NFIP) but has chosen to not participate in the NFIP Community Rating System (CRS) Program. The Town is in good standing with the NFIP through adoption and enforcement of floodplain management requirements (e.g., regulating all new and substantially improved construction in Special Hazard Flood Areas), floodplain identification and mapping, and flood insurance outreach to the community. The Town's NFIP participation information is listed in **Table 10**.

CID	NFIP Participation Date	Current Effective FIRM Date	CRS Entry Date	CRS Current Effective Date	CRS Rating
360973A	3/22/1974	11/4/2016	N/A	N/A	N/A

Table 10. NFIP Participation Information

5.1. NFIP Floodplain Administrator

All NFIP participating jurisdictions have a designated Floodplain Administrator that is charged with enforcing floodplain regulations, routinely monitoring the floodplains, and providing community assistance such as encouraging owners to maintain flood insurance. The Town of DeWitt Floodplain Administrator information is listed in **Table 11**.

Table 11. Floodplain Administrator	Table 11.	Floodplain	Administrator
------------------------------------	-----------	------------	---------------

Name	Title	Department	Phone Number
Doug Miller	Town Engineer	Miller Engineers	(315) 558-8417

5.2. Repetitive Loss and Severe Repetitive Loss Property

FEMA defines a Repetitive Loss property as an NFIP-insured property meeting at least one (1) of the following paid loss criteria since 1978, regardless of any changes in ownership:

- Four (4) or more separate claims payments greater than \$5,000 each (including building and contents payment).
- Two (2) or more separate flood insurance claims payments (building payments only), where the total of the payments is greater than the property's current value.

Additionally, to receive a designation, at least two (2) of the claim payments must occur within 10 years of one another.⁵

A Severe Repetitive Loss property is defined by FEMA as any NFIP-insured single-family or multi-family residential building meeting at least one (1) of the following paid loss criteria since 1978 or from building constructed after 1978, regardless of any changes in ownership:⁶

- That has incurred flood-related damage for which four (4) or more separate claims payments have been made, with the amount of each claim (including building and contents payments) exceeding \$5,000, and with the cumulative amount of such claims payments exceeding \$20,000.
- For which at least two (2) separate claims payments (building payments only) have been made under such coverage, with the cumulative amount of such claims exceeding the market value of the building.

⁵ Federal Emergency Management Agency, National Flood Insurance Program. (2023). A Policyholder's Guide to Severe Repetitive Loss. Retrieved from <u>https://agents.floodsmart.gov/sites/default/files/fema_nfip-policyholders-guide-severe-repetitive-loss brochure 07-2023.pdf</u>.

Table 12 summarizes FEMA Repetitive Loss and Severe Repetitive Loss properties within the Town of DeWitt.

Table 12.	Repetitive Loss and Severe Repetitive Loss Properties
-----------	--

	Repetitive Loss Properties	Severe Repetitive Loss Properties			
Total	Occupancy	Total Occupancy			
6 5 Non-Residential Building 1 Non-Residential Business 3 3 Non-Residential Building					
Occupancy Type: Single Family = Single family residence • Two (2)-Four (4) Unit Residential Building = Two (2)-four (4) unit residential building • More Than Four (4) Units Residential Building = Residential building with more than four (4) units • Non-Residential Building = Non-residential building • Non-Residential Business = Non-residential business • Single Family Residential Building = Single-family residential building with the exception of a mobile home or a single residential unit within a multi-unit building • Residential (2, 3, or 4 units) Non-Condo Building = Residential non- condo building with two (2), three (3), or four (4) units seeking insurance on all units • Residential (5 or more units) Non-Condo Building = Residential non-condo building with 5 or more units seeking insurance on all units • Residential Mobile/Manufactured Home = Residential mobile/manufactured home • Residential Condo Association = Residential condo association seeking coverage on a building with one (1) or more units • Single Residential Unit = Single residential unit within a multi-unit building • Non-Residential Mobile/manufactured Home = Non-residential mobile/manufactured home • Non-Residential Building = Non-residential building • Non-Residential Unit = Non-residential unit within a multi-unit building • Non-Residential Unit = Non-residential unit within a multi-unit building • Non-Residential Unit = Non-residential unit within a multi-unit building • Non-Residential Unit = Non-residential unit within a multi-unit building • Non-Residential Unit = Non-residential unit within a multi-unit building • Non-Residential Unit = Non-residential unit within a multi-unit building • Non-Residential Unit = Non-residential unit within a multi-unit building • Non-Residential Unit = Non-residential unit within a multi-unit building • Non-Residential Unit = Non-residential unit within a multi-unit building • Non-Residential Unit = Non-residential unit within a multi-unit building • Non-Residential Unit = Non-residential unit within a					

Table 13 summarizes the NFIP active policies and coverage in force data for the Town of DeWitt.

Table 13. NFIP Policies

NFIP Policies	Insurance in Force	Total Claims Paid	Sum of Claims Paid
82	\$489,512	46	\$4.466 Million

5.3. Participation Activities

The Town of DeWitt NFIP participation over the last five (5) years includes the following:

- Provides the following services permit review, GIS, inspections, and engineering capability.
- Teaches property owners or other stakeholders about the importance of flood insurance through public outreach events, workshops, and/or seminars.
- Enforces local floodplain regulations and monitors compliance.
- Floodplain management regulations meet or exceed FEMA or State minimum requirements.

5.3.1. Regulatory

Flood Damage Prevention Ordinance

The Town of DeWitt's Flood Damage Prevention Chapter (*Chapter 100 of the Town Code*) was adopted to promote the public health, safety, and general welfare, and to minimize public and private losses due to flood conditions in specific areas by provisions designed to:

- Regulate uses which are dangerous to health, safety and property due to water or erosion hazards, or which result in damaging increases in erosion or in flood heights or velocities.
- Require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction.
- Control the alteration of natural floodplains, stream channels, and natural protective barriers which are involved in the accommodation of floodwaters.

- Control filling, grading, dredging and other development which may increase erosion or flood damages.
- Regulate the construction of flood barriers which will unnaturally divert floodwaters or which may increase flood hazards to other lands.
- Qualify for and maintain participation in the NFIP.

The objectives of this Chapter are to:

- Protect human life and health.
- Minimize expenditure of public money for costly flood control projects.
- Minimize the need for rescue and relief efforts associated with flooding and generally undertaken at the expense of the general public.
- Minimize prolonged business interruptions.
- Minimize damage to public facilities and utilities, such as water and gas mains, electric, telephone, and sewer lines, streets and bridges located in areas of special flood hazard.
- Help maintain a stable tax base by providing for the sound use and development of areas of special flood hazard so as to minimize future flood blight areas.
- Provide that developers are notified that property is in an area of special flood hazard.
- Ensure that those who occupy the areas of special flood hazard assume responsibility for their actions.

Substantial Damage

Substantial damage means damage of any origin sustained by a structure whereby the cost of restoring the structure to its before damaged condition would equal or exceed 50% of the market value of the structure before the damage occurred. *(Chapter 100 of the Town Code)*

Substantial Improvement

Substantial improvement means any reconstruction, rehabilitation, addition, or other improvement of a structure, the cost of which equals or exceeds 50% of the market value of the structure before the "start of construction" of the improvement. The term includes structures which have incurred "substantial damage," regardless of the actual repair work performed. The term does not, however, include either:

- A. Any project for improvement of a structure to correct existing violations of state or local health, sanitary, or safety code specifications which have been identified by the local code enforcement official and which are the minimum necessary to assure safe living conditions; or
- B. Any alteration of an "historic structure," provided that the alteration will not preclude the structure's continued designation as an "historic structure." (*Chapter 100 of the Town Code*)

There are other local ordinances, plans or programs (e.g., site plan review) that support floodplain management and meeting the NFIP requirements.

6. HAZARD MITIGATION PLAN INTEGRATION

In order for a community to successfully reduce long term risk, hazard mitigation must be integrated into day-today planning mechanisms and initiatives. Plan integration is the process by which communities critically assess the existing planning framework and align efforts with the goal of reducing long term risks and building a more resilient community. It involves a two (2) way exchange of information and incorporation of ideas and concepts between hazard mitigation plans and other community plans. In particular, plan integration involves the incorporation of hazard mitigation principles and actions into other plans, and planning mechanisms into hazard mitigation plans. Plan integration involves community plans, policies, codes, and programs that guide development, roles, and responsibilities in implementing these capabilities. Additionally, plan integration is achieved through the involvement of key staff and community officials in collaborative hazard mitigation planning.

6.1. Existing Plan Integration

A hazard mitigation plan must explain how the jurisdiction incorporated the previous Plan update over the last five (5) years to demonstrate progress in local mitigation efforts. In the performance period since the adoption of the previous Hazard Mitigation Plan, the Town of DeWitt made progress on integrating components of the hazard mitigation strategy (e.g., goals, objectives, and actions) into planning initiatives and mechanisms. **Table 14** highlights the planning mechanisms/initiatives where the previous Plan was integrated and what information was integrated.

Planning Initiative	Current Integration Description
Local Waterfront Revitalization Program	The LWRP includes projects that pertain to hazard mitigation and are aligned with this Hazard Mitigation Plan.
Sustainability Plan	The Town's Sustainability Plan outlines actions to mitigate hazards within the Town which include the protection of open space through land grants, the restoration of wetlands and floodplains to respond to severe weather events, and the modification of zoning to discourage new development in flood-prone areas.
Emerald Ash Borer Management Plan	The Town's Emerald Ash Borer Management Plan outlines hazard mitigation for the Emerald Ash Borer (EAB), an invasive species that decimated deciduous forests in the region. These include a mixed strategy of preemptive removal of trees prior to mortality, protection and preservation of ash trees with pesticides, planting of new non-host trees, and/or a do-nothing strategy in specific areas.
Comprehensive Emergency Management Plan	The Town's Comprehensive Emergency Management Plan refers to the Hazard Mitigation Plan.
Zoning Ordinance	The Town's Zoning Ordinance considers natural hazard risk and require developers to take additional actions to mitigate natural hazard risk.
Subdivision Code	The Town's Subdivision Ordinance considers natural hazard risk and requires developers to take additional actions to mitigate natural hazard risk.
Site Plan Review	The Site Plan Review process considers natural hazard risk and requires developers to take additional actions to mitigate natural hazard risk.
Planning Board	The Town's Planning Board is required to ensure that site plans consider flood and other natural hazard risk and implement the appropriate mitigation strategies.
Retrofitting/Removal of Structures from Hazard Prone Areas	The Town supports the retrofitting, purchase, or relocation of structures located in hazard prone areas to protect structures from future damage, with repetitive loss and severe repetitive loss properties as priority. The Town works to identify areas that may be impacted by natural hazards and facilities that are viable candidates for each strategy based on cost-effectiveness. Implementation of these hazard mitigation actions are based on available funding.

Table 14.	Current Plan Integration
-----------	---------------------------------

Planning Initiative	Current Integration Description	
Public Outreach	A variety of public outreach mechanisms are used to inform citizens on natural hazards – Town Newsletter, social media, the Town's website, and other local media outlets. The Town's website provides information related to safety and hazard mitigation including local emergency response contact information, current information relating to flood risks, stormwater management, and street tree management, and links to related ordinances and plans.	

6.2. Potential Future Integration

A hazard mitigation plan must explain how the jurisdiction intends to incorporate this Plan update into planning mechanisms over the next five (5) years. The capability assessment presented in Section 4 of this Annex identifies codes, plans, and programs that provide opportunities for integration. **Table 15** outlines planning mechanisms/initiatives that do not currently integrate goals and recommendations of this Plan but provide opportunities to do so in the future.

Planning Initiative	Potential Integration Description		
Zoning Ordinance	Hazard mitigation could be integrated into future Zoning Ordinance updates to inform appropriate use of property within the Town. Portions of this Hazard Mitigation Plan should be reviewed to consider any future improvements to the Code, if appropriate.		
Subdivision Ordinance	Hazard mitigation could be integrated into future Subdivision Ordinance updates to guide and regulate the Town's land use. Portions of this Hazard Mitigation Plan should be reviewed to consider any future improvements to the Code, if appropriate.		
Comprehensive Plan	Specific mitigation actions in the Town's Comprehensive Plan include the identification and designation of Critical Environmental Areas and the recommendation to further investigate various tools for the protection and preservation of natural resources. The Comprehensive Plan identifies areas impacted by flood zones but does not refer to the County's Hazard Mitigation Plan.		
	The Hazard Mitigation Plan should be incorporated in the next update of the Town's Comprehensive Plan to enhance the community's resilience by integrating strategies for risk reduction into land use, development, and infrastructure planning. Furthermore, hazard mitigation goals could be aligned with the vision of the Comprehensive Plan and hazard risk assessment information could be used to address vulnerabilities.		
Urban Forestry Management Plan	The Town's Urban Forestry Management Plan outlines the foundation for future planning efforts to increase urban tree canopy cover to enhance the environmental and economic benefits provided by urban forests. These planning efforts could help mitigate the impacts of heat wave/extreme heat events.		
Revitalize Butternut Preliminary Design Report	The Revitalize Butternut Preliminary Design Report includes assessments of trail options and recreational/ecological improvements for areas surrounding the Orville Feeder Canal (i.e., Butternut Feeder Canal). Relevant findings of the report include an assessment of necessary data and preliminary cost estimates for water quality improvements (which includes the repair of canal sluicegates) and cost estimates for ecological enhancements including removal of invasive species, establishment of new plantings, and streambank stabilization. The Hazard Mitigation Plan may identify new possible funding sources for projects identified in this Report and may result in modifications to proposed projects based on results of the risk assessment.		

Planning Initiative	Potential Integration Description	
Jamesville Hamlet Master Plan	The Jamesville Hamlet Master Plan, last updated in 2019, provides a list of issues and opportunities facing the community and provides a collection of recommendations and conceptual designs for sites throughout Jamesville. Relevant recommendations include promoting sustainable development through healthy and stable housing and protecting high air, soil, and water quality. The Hazard Mitigation Plan may identify new possible funding sources for stormwater improvement projects and may result in modifications to proposed projects based on results of the risk assessment.	
Municipal Budget	The Town could add a line item for mitigation projects/activities into the Municipal Budget and capital improvement funding.	

The Town's Local Planning Team will identify all relevant planning initiatives that are scheduled to be updated in the next year and during the annual update process of the Hazard Mitigation Plan. Additionally, opportunities to integrate key elements of the Hazard Mitigation Plan, specifically any relevant strategies, into the planning initiatives will be identified by the Local Planning Team. Mitigation actions were identified to promote plan integration in future revisions of this Plan.

7. SIGNIFICANT HAZARD PAST EVENTS

A complete risk assessment, including past incidents, for each identified hazard of concern can be found in **Volume** 1 of this Plan. A summary of past events is provided under each hazard profiles and includes a chronology of events that have affected the County and its municipalities. **Table 16** provides information on significant hazard events that uniquely impacted the Town of DeWitt.

Date	Event Type (Disaster Declaration, if applicable)	Description
July 24, 2017	Severe Weather	Severe thunderstorms produced strong winds/damaging winds which required clean up and trash removal. The event did not warrant a disaster declaration, but overtime pay was provided to the Highway Department.
June 30 – July 1, 2015	Flood	An unseasonably strong storm system tapping into above normal moisture sources across the Great Lakes and Northeast triggered multiple thunderstorms that produced heavy rainfall across the region. Localized torrential rainfall in central New York caused serious urban flash flooding in the Syracuse, NY metropolitan area. Damages were estimated between \$3 and \$5 Million. Residences in the Franklin Park area experience flooding in the basements.
2014 – Present	Invasive Species and Infestation	The Emerald Ash Borer (EAB) has killed ash trees throughout the County, including in the Town of DeWitt. The EAB has resulted in inoculation costs, trees taken down, Tree Naturalist training, and time paid.
April 25, 2011	Severe Weather, Flood (DR-1193)	A slow moving warm front moved northward across central New York late in the afternoon on April 25 th producing severe weather in the region. There were reports of severe thunderstorms with strong winds/damaging winds, hail, and tornadoes. Additionally, these storms produced heavy rainfall which caused flash flooding in several locations throughout central New York. The Town's Highway Department had to repair roadway shoulders that were washed out.

Table 16.Hazard Event History

Date	Event Type (Disaster Declaration, if applicable)	Description
May 26, 2011	Severe Weather	On May 26 th , a deep upper level low pressure system shifted east from the mid-Mississippi Valley region through the afternoon and evening, producing numerous showers and thunderstorms. Many reports of large hail and strong winds/damaging winds occurred in central New York.

8. HAZARD VULNERABILITY AND IMPACT ASSESSMENT

Exposure and vulnerability to certain hazards affect the entire County and others are geographically defined. Although the entire County may be vulnerable to these hazards, their impacts may vary based on existing community conditions (e.g., underserved, or functional access needs populations may be more susceptible based on certain conditions, vulnerabilities, or needs).

Table 17 outlines the *unique vulnerabilities and impacts* for the Town of DeWitt and only addresses the hazards that are relevant and unique to the jurisdiction. A complete risk assessment for each identified hazard of concern is in **Volume 1** of this Plan. Hazard mapping can be found in **Appendix A** of this Annex.

Hazard	Vulnerabilities and Impacts	
Drought	The Local Planning Team determined that the Town does not have unique vulnerabilities and impacts to drought; rather, the jurisdiction's vulnerability and impacts are consistent with those experienced throughout the County.	
Earthquake	The Town has local geological configurations including steep slopes and drumlins that may be affected by earthquake events.	
	The following locations within the Town have underserved population (e.g., elderly, children) that could be uniquely impacted in the event of a heat wave/extreme heat event:	
	Springfield Gardens	
Heat Wave/Extreme Heat	Nottingham Senior Center	
	Menorah Park	
	• Mobile Home Parks – Midler Meadows, Cliffside, Pleasant Valley, and Lyndon Park	
	The following areas within the Town are consistently impacted by flooding:	
	Franklin Park	
Flood	Ley Creek North Branch	
(riverine, flash/urban, ice jam, dam and levee failure)	Teal Brook	
	Ley Creek Eastern Branch	
	• Convergence of Ley Creek and Teal Brook at Best Tile/General Motors area	
Geological Hazards (landslides, land subsidence, mudboils)	There are steep slopes on the south side of Town and drumlins formations in the central and southern portion of the Town which are both located where buildings encroach on these hazard prone areas.	

Table 17.Hazard Vulnerability and Impact Assessment

Hazard	Vulnerabilities and Impacts	
Harmful Algal Bloom	The Local Planning Team determined that the Town does not have unique vulnerabilities and impacts to harmful algal blooms; rather, the jurisdiction's vulnerability and impacts are consistent with those experienced throughout the County.	
Invasive Species and Infestation (Emerald Ash Borer, Hemlock Woolly Adelgid, True Armyworm, Common Reed (Phragmites), Eurasian Watermilfoil, Water Chestnut, Tick-Borne Diseases, Mosquito-Borne Diseases)	There are significant amounts of Emerald Ash Borer, Mosquito-Borne Diseases, Phragmites and Tick Borne Diseases within the Town.	
Severe Weather (severe thunderstorms – hail, strong winds/damaging winds, tornadoes, hurricane/tropical storm)	Severe weather has a direct impact upon the Franklin Park subdivision and the Ley Creek Drainage basin.	
Winter Weather (blizzards, heavy snow, ice storms, cold wave/extreme cold, nor'easter)	The Local Planning Team determined that the Town does not have unique vulnerabilities and impacts to winter weather; rather, the jurisdiction's vulnerability and impacts are consistent with those experienced throughout the County.	
Wildfire (wildfire smoke)	The Local Planning Team determined that the Town does not have unique vulnerabilities and impacts to wildfire; rather, the jurisdiction's vulnerability and impacts are consistent with those experienced throughout the County.	

The Town evaluated whether vulnerability in hazard prone areas had increased, decreased, or remained the same for each natural hazard identified in this Hazard Mitigation Plan. Climate change, changes in population, infrastructure expansion, and economic shifts that can affect vulnerability were considered. For example, if planned development is in an identified hazard areas or is not built to the updated building codes, it may increase the community's vulnerability to future hazards and disasters. On the other hand, if development occurred with mitigation practices in place, the vulnerability may have remained the same or decreased. Additionally, shifting demographics (e.g., underserved population) were taken into consideration.

Table 18 outlines whether climate change has increased or decreased the Town's vulnerability (i.e., exposure) and impact to each natural hazard over the past five (5) years, and the effect of climate change in the future probability of occurrence and impacts from each natural hazard.

Hazard	Vulnerability and Impact	
Current Vulnerability and Impact		
Drought	Increased	
Earthquake	Remained the Same	
Heat Wave/Extreme Heat	Increased	
Flood (riverine, flash/urban, ice jam, dam and levee failure)	Increased	
Geological Hazards (landslides, land subsidence, mudboils)	Remained the Same	
Harmful Algal Bloom	Increased	
Invasive Species and Infestation (Emerald Ash Borer, Hemlock Woolly Adelgid, True Armyworm, Common Reed (Phragmites), Eurasian Watermilfoil, Water Chestnut, Tick-Borne Diseases, Mosquito-Borne Diseases)	Increased	
Severe Weather (severe thunderstorms – hail, strong winds/damaging winds, tornadoes, hurricane/tropical storm)	Increased	
Winter Weather (blizzards, heavy snow, ice storms, cold wave/extreme cold, nor'easter)	Remained the Same	

 Table 18.
 Climate Change Current and Future Vulnerability and Impact

Wildfire (wildfire smoke)	No Change Anticipated			

8.1. Future Major Assets

Community assets should include anything that is important to the character and function of a community. Assets include people (i.e., underserved population); structures (i.e., new and existing buildings); community lifelines and other critical facilities; natural, historic, and cultural resources; and the economy and other activities that have value to the community. Although all assets may be affected by the hazards identified in this Hazard Mitigation Plan, the jurisdiction identified future major assets that may be more vulnerable and impacted by these hazards.

• The Town anticipates people, structures, critical facilities, natural resources, and the economy within the Town may be exposed or vulnerable to any of the natural hazards identified in this Hazard Mitigation Plan. However, future major assets within the Town may be most vulnerable to drought, flood, heat wave/extreme heat, invasive species and infestation, severe weather, winter weather, and wildfires. Any new assets (e.g., new construction in hazard prone areas) will be constructed to adhere to the latest building codes and standards, and mitigation to protect them from identified and anticipated hazards, especially those that are expected to increase due to climate change.

9. CRITICAL FACILITIES FLOOD RISK

New York State Department of Environmental Conservation (NYSDEC) Title 6, Chapter V, Subchapter A, Part 502 sets forth local floodplain management criteria for State projects located within flood hazard areas. The law states that no such projects related to critical facilities shall be undertaken in a Special Flood Hazard Area (SFHA) unless built according to certain mitigation specifications, including being raised two (2) feet above the Base Flood Elevation (BFE).⁷ While all vulnerabilities should be assessed and documented, the State places a high priority on exposure to flooding.

Jurisdictions must identify all critical facilities, assess their vulnerabilities, and evaluate and ensure they are protected to a 0.2% chance (500-year) flood event. Critical facilities that are located in an SFHA and/or have been previously flooded, must be protected against a repeat of that flood or to the 0.2% chance flood event, which ever provides the greater protection. The Plan must document those critical facilities are protected to a 0.2% flood event, or previous worst case flood event. For those that do not meet this level of protection, the Plan must include a mitigation action to meet or go beyond this criterion or explain why it is not feasible to do so.⁸

Table 21 identifies critical facilities in the community located in the 100-year and 500-year floodplain.

Table 21. Folential Flood Losses to Critical Facilities

10. HAZARD RISK RANKING

Table 22 presents the local hazard ranking for the Town of DeWitt of all hazards of concern listed in **Volume 1** of this Plan. This ranking summarizes how hazards vary for this jurisdiction. As thoroughly described in **Volume 1** of this Plan, the ranking process involves an assessment of the likelihood of occurrence for each hazard, along with its potential impacts on people, property, and the economy. For further details on how the probability, extent, vulnerability, and impact factors in **Table 22** were calculated, please refer to Section 4.3 in **Volume 1** of this Plan.

It is important to note that the sub hazards for severe weather (i.e., strong winds/damaging winds, severe thunderstorms, tropical storm/hurricane, hail, and tornado), geological hazards (i.e., landslide, land subsidence, and mudboils), flood (i.e., riverine/creek flooding and ice jam, and urban/flash flooding), and winter weather (i.e., blizzards, lake effect snow, nor'easter, and ice storm, and cold wave/extreme cold) were individually ranked in the hazard risk ranking; however, severe weather, geological hazards, flood, and winter weather are each considered as the main hazard throughout this Annex and **Volume 1**.

Table 22.Town of DeWitt Hazard Risk Ranking

Hazard Event	Probability Factor	Sum of Weighted <u>Extent</u> Factors	Sum of Weighted <u>Vulnerability</u> Factors	Sum of Weighted <u>Impact</u> Factors	Consequence Score	Total Risk Score (Probability x Consequence)
Flood (Riverine/Creek, Ice Jam)	3	12	11	29	52	73
Flood (Urban/Flash Flood)	3	12	11	29	52	73
Winter Weather (Blizzards, Lake Effect Snow, Nor'easter, Ice Storm)	3	12	14	21	47	67

Hazard Event	Probability Factor	Sum of Weighted <u>Extent</u> Factors	Sum of Weighted <u>Vulnerability</u> Factors	Sum of Weighted <u>Impact</u> Factors	Consequence Score	Total Risk Score (Probability x Consequence)
Severe Thunderstorm (Severe Weather)	3	12	16	14	42	61
Strong Winds/ Damaging Winds (Severe Weather)	3	12	11	16	39	57
Cold Wave/Extreme Cold (Winter Weather)	2	12	14	21	47	48
Heat Wave/Extreme Heat	2	9	11	19	39	41
Drought	2	12	12	13	37	39
Invasive Species and Infestation	2	9	8	18	35	37
Landslide (Geological Hazards)	2	9	6	18	33	35
Tropical Storm/ Hurricane (Severe Weather)	1	9	16	24	49	27
Dam and Levee Failure (Flood)	1	12	11	24	47	26
Land Subsidence (Geological Hazards)	1	9	14	14	37	22
Hail (Severe Weather)	1	6	16	14	36	21
Earthquake	1	6	16	12	34	20
Tornado (Severe Weather)	1	6	6	22	34	20
Harmful Algal Bloom	1	6	6	16	28	17
Mudboils (Geological Hazards)	1	3	6	13	22	14
Wildfire (Wildfire Smoke)	1	3	6	11	20	13

Consequence: Sum of <u>all</u> weighted factors. Extent: Sum of the weighted <u>Extent</u> factors. Vulnerability: Sum of the weighted <u>Vulnerability</u> factors. Impact: Sum of the weighted <u>Impact factors</u>. Total Risk Score* = Probability x Consequence * Normalized to 100

	Total Risk Score Legend												
Classification	Probability Factor	Extent	Vulnerability	Impact	Consequence Score	Total Risk Score							
Low (L)	1	0-6	0-6	0-12	0 - 24	0 - 24							
Medium (M)	2	7 – 12	7 – 12	13 - 26	25 - 50	25 - 54							
High (H)	3	13 - 18	13 - 18	27 - 39	51 - 75	55 and above							

The legend—specifically the assignment of low, medium, and high—provides an additional means to qualitatively assess the probability factor, sum of weighted factors, and the total risk scores for each hazard. The Consequence Score represents the sum of the Extent, Vulnerability, and Impact Factors. The Total Risk Score is a measure of Probability and Consequence.

11. MITIGATION ACTIONS

This section includes the mitigation actions that were developed to address identified risks and vulnerabilities to hazards identified in this Plan. This Plan serves only to recommend mitigation measures based on the potential for risk reduction and available funding. Implementation of mitigation actions is dependent on risk reduction priorities, feasibility, and available funding. It is also dependent on the cooperation and support of the jurisdiction and/or department responsible for each action item. Additionally, all mitigation actions identified in the 2019 update or before were updated accordingly. Any new mitigation actions are listed as *New* (under Project Status).

The Town of DeWitt agreed upon **43** mitigation actions that apply to the jurisdiction's properties where they have jurisdictional responsibility and authority. One (1) mitigation action was completed, and one (1) mitigation action was discontinued. A summary of the Town's mitigation actions status is listed in **Table 23**.

Status		Mitigation Action Total				
Continuous		4				
In Progress/Not Yet Completed		6				
No Progress/Not Yet Started		16				
New		17				
	TOTAL	43				
Complete		1

APPENDIX A. HAZARD MAPS

The following hazard maps have been generated for the Town of DeWitt – [enter hazards here]. These maps are based on the best available data at the time of the preparation of this Plan and are considered to be adequate for planning purposes. Maps have only been generated for those hazards that can be clearly identified using mapping techniques and technologies, and for which the Town of DeWitt has significant vulnerability.
